

Wilde Image Author Visits and Speaking Events

Enrichment Programs Integrating Science and Language Arts

“The process of learning for life begins by engaging young minds with the wonders of nature.”

Diana & Buck Wilde
Ph.D./Education Naturalist, BBC

Dynamic Speakers + Innovative Presentations = A Special Visit

“Many authors visit our school. They’re a perfect team and hands down THE BEST. Presentations are top notch with thinking to challenge teachers as well as the students.” -Teacher

“What a great thing you’re doing for kids. Here’s what our teachers had to say, “Not only are they experts in their field, but they really know how to put on a show.” -Librarian

“Their incredible photography transported our children into another world-one made understandable by the team’s fascinating, age-appropriate narrative.” -PTA

“Science and language arts were integrated in a way that energized us all.” -Principal

“You really inspired me to look at learning differently.” -Student

Wetland Wonders

-the nature of relationships-

A wetland is alive morning, noon and night with all kinds of creatures. See how their lives are interrelated to one another, to the surrounding forests and meadows, and to the world beyond.

Super Senses

-the nature of uniqueness-

Everyone has a strength. Some species see, smell or hear better than others and seize the advantage. Using hi-tech gear, kids explore super senses and reconsider their own unique abilities.

Grizzly Survival

-the nature of learning-

A mother and two cubs face daily challenges in the wilderness. Walk alongside them through their first summer and discover the importance of experiential learning and problem solving.

Dinosaur Feathers

-the nature of adapting-

Travel to a world inhabited by feathered dinosaurs and giant dragonflies. Compare them to species living in other times and see why adaptability works so well in this ever-changing world.
